Track. Analyze. Report.

Intuitive and customizable templates allow staff to quickly complete incident reports. Predefined matrix allows reports to be automatically sent to supervisors, Risk Management and even insurance providers by a click of a button. Incidents can be started in the field, updated and uploaded straight from the mobile device with the ability to send real time data to your centralized system.

A TOTAL INTEGRATED SOLUTION TO MOBILE INCIDENT TRACKING

Advance incident tracking provides powerful tools to report, manage, and resolve incidents in a timely manner.

Case Global's powerful visualization technology allows security, risk management, and loss prevention incidents to be plotted on phyiscal maps of your locations so that critical trends may be identified, and acted upon now.
